Integrated Ecosystem Research & Management  
(MEFB 508, 4 credits)

DATES: June 29 – July 13, 2020  
FACULTY: Dr. Mike Sigler, Dr. Elizabeth Siddon, Dr. Chris Siddon, and Dr. Jennifer Seavey  

COURSE DESCRIPTION: Come to Appledore Island in the Gulf of Maine and conduct an integrated ecosystem research project. Present your recommendations to an expert panel representing seabird, marine mammal, and fisheries managers. Your project will address a real-world conservation and management challenge and consider both ecological and human dimensions. You will learn and apply multiple field, lab, and data analysis methods. Work conducted during this project-based course may qualify as a capstone experience in your major. Check with your advisor.
