

LS S110 – Library Resources and Information Literacy

Upon successful completion of this course, students will be able to:

1. Critically evaluate information resources, with particular attention to authority and context, in order to select the best information possible for a specific purpose.
2. Assess different types of collections and information resources in order to determine the most useful collection and resource for a particular context and information need.
3. Formulate and revise search strategies in order to find relevant information using a variety of search tools and collections.
4. Identify current issues related to information literacy and describe their impact on the individual and society.

LS S111 – Library Information Literacy for E-Learners

Upon successful completion of this course, students will be able to:

1. Critically evaluate information resources, with particular attention to authority and context, in order to select the best information possible for a specific purpose.
2. Assess different types of collections and information resources, primarily in the online environment, in order to determine the most useful collection and resource for a particular context and information need.
3. Formulate and revise search strategies in order to find relevant information using search tools and collections that are readily available to e-Learners.
4. Identify current issues related to information literacy and describe their impact on the individual and society.
