Faculty Senate determines general policy and which groups can bring forward specific curriculum proposals that cross faculty lines. Once a policy has been approved by Faculty Senate, specific curriculum proposals go to the Curriculum Committee. Policy change items impact more than one faculty group, such as establishing changes to required GERs, or changes to common requirements of the BLA.

Type of proposal:

Course offered by:

Department:

Change Affects:

Existing Description: (include current section in catalog)

Proposed Description:

Double Major: A double major may be earned by completing all general education requirements, degree requirements and requirements of the major for both degrees. A single catalog must be followed for both degree programs. Students must apply for and be accepted into both degree programs. Students may declare a double major at the time of initial admission to UAS or add a major at a later date through the Change of Major/degree process.

Rationale:

Students should be able to obtain a double major by satisfying the requirements of both degrees. We already have a process to obtain a second bachelor degree, in which 24 credits beyond the first bachelor degree is required. A double major is for students that know they want a bachelor degree in two different fields, so they would not need the extra credits. For example, a student would have the opportunity to double major in (Marine) Biology and Math, (Marine) Biology and Environmental Science, or Environmental Science and Math. A double major would enhance opportunities for graduate school and employment.
