Access a UAS Student Virtual Machine

A Student Virtual Machine can be accessed through a browser or by installing the desktop version of VMware Horizon Client.

To access in a browser:
2. Choose VMware Horizon HTML Access

To install the desktop client:

2. Choose Install VMware Horizon Client and install the appropriate client for your operating system.

3. Once the client has been installed, launch the program and add a new server.

4. Enter mydesktop.uas.alaska.edu and click Connect.
5. Log in with your **UA Username/password**. Set the Domain to **UA**.

![Login window with UA Username/password and Domain set to UA](image)

6. Double-click on the **Student** profile.
