Library Workshops for Your Students

Your liaison can facilitate hands-on research workshops in your classes to help your students complete their research assignments. We customize each workshop to your course objectives and assignment and provide workshops for both introductory and advanced level courses. If you are teaching an online class, ask us about digital learning resources tailored to your course and research assignment.

Collaborate with a Librarian

Do you have an assignment directing students to use specific library resources? Contact us to make sure you have the most up-to-date information about the available materials in our collection. We can create online “Research Guides” that highlight the resources most relevant to your assignment. Interested in creating a permanent link to a library resource, article, or book in your Blackboard course site? We’re happy to help.

Faculty Library Cards

Faculty members can check out library materials from the general collection for 120 days (+ 1 renewal). Explore new works in your field or a text you are considering teaching.

Collection Development / New Publication Alerts

Egan Library welcomes suggestions for collection development purchases. Please let us know of any resources you feel would improve our collection or better support your course by using our online purchase request form (<http://tinyurl.com/eganpurchase>) or talking to your librarian liaison. We can also help you sign up for email notifications with new titles being published in your discipline or research area.
