

AY 2019/20 Assessment Plan

10/30/20

Assessment of the Construction Technology program for AY 19/20 will look very much like the assessment done for AY 18/19 with a few revisions. The results of the last assessment did indicate changes to the program that may enhance student learning outcomes, retention and completion rates.

In AY 19/20 the program offered the newly revised course and program offerings that were approved at the end of AY18/19. The changes to the program, re-titling several courses and addition of new Occupational Endorsements will necessitate revising the course list used in the last assessment. The department has also decided to develop a better rubric for evaluating student artifact samples.

Action Plan

1. Re-write Measures, Goals, Use of Information table
2. Re-write Course and Goals table
3. Create a rubric for evaluating student artifacts
4. Prepare a shared folder for collection of student artifacts
5. Include advisory committee notes in AY 19/20 assessment report
6. Re-write SLO #4
